"In 1892 a charter was secured by General Isaac J. Wistar, of Philadelphia, from and under the laws of the commonwealth of Pennsylvania, conferring perpetual incorporation, with the right of perpetual succession and a corporate seal, upon a corporation to be called 'The Wistar institute of anatomy and biology.' The museum, commonly known for many years as the Wistar or Wistar and Horner museum, and a plot of ground, were presented by the University of Pennsylvania to the Wistar institute ... The institute was established as a research museum to serve all institutions alike in the encouragement of original scientific research in anatomy and biology. Its laboratories and collections are open under suitable regulations to investigators from all institutions, and to private individuals, who are capable of making proper use of its advantages ... By special arrangement ... graduate students of the University of Pennsylvania may enjoy the advantages of the institute's research laboratories and take research work in neurology and embryology as part of the required work for the doctor's degree."—Catalogue of the University of Pennsylvania, 1915/16, p. 493-494.
